

DISCOVER THE NEXT GENERATION

ORYX

SPORT CRUISERS

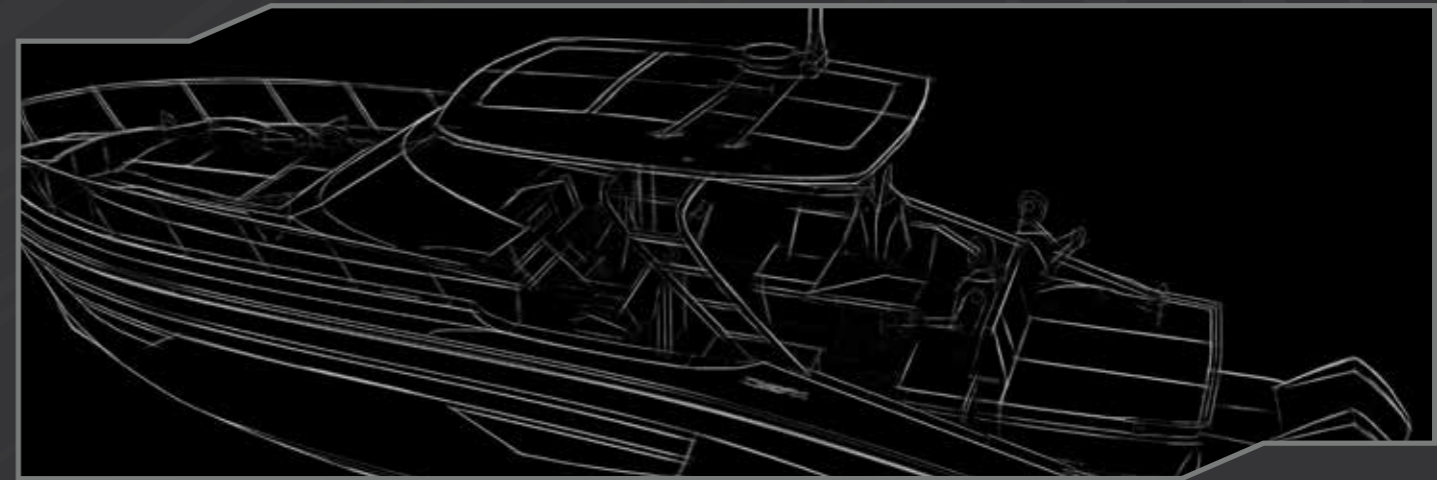

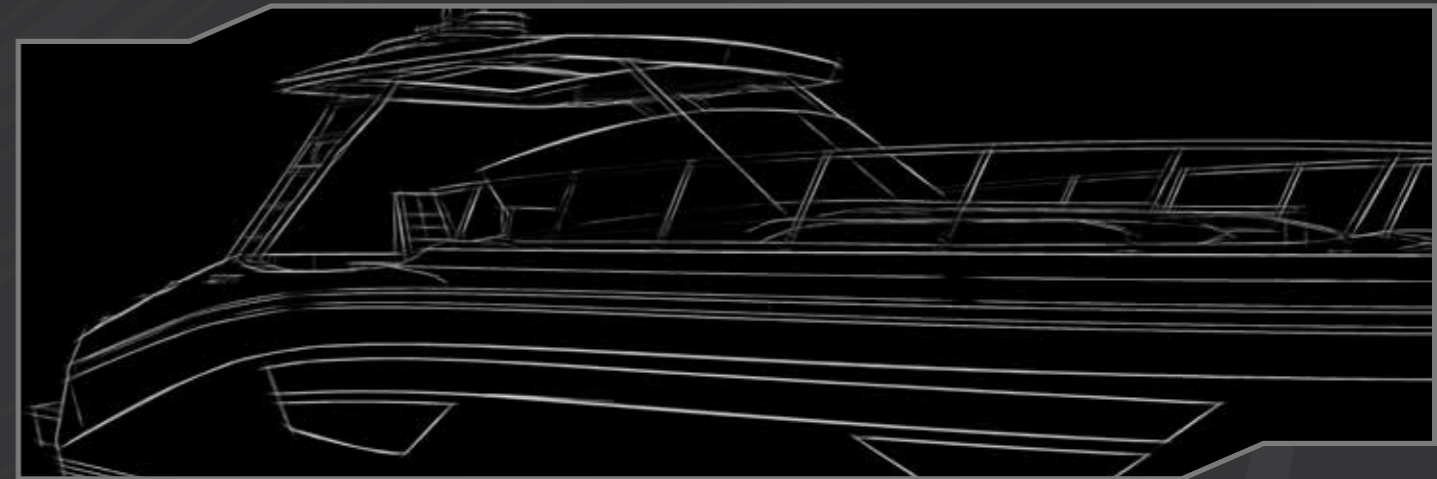

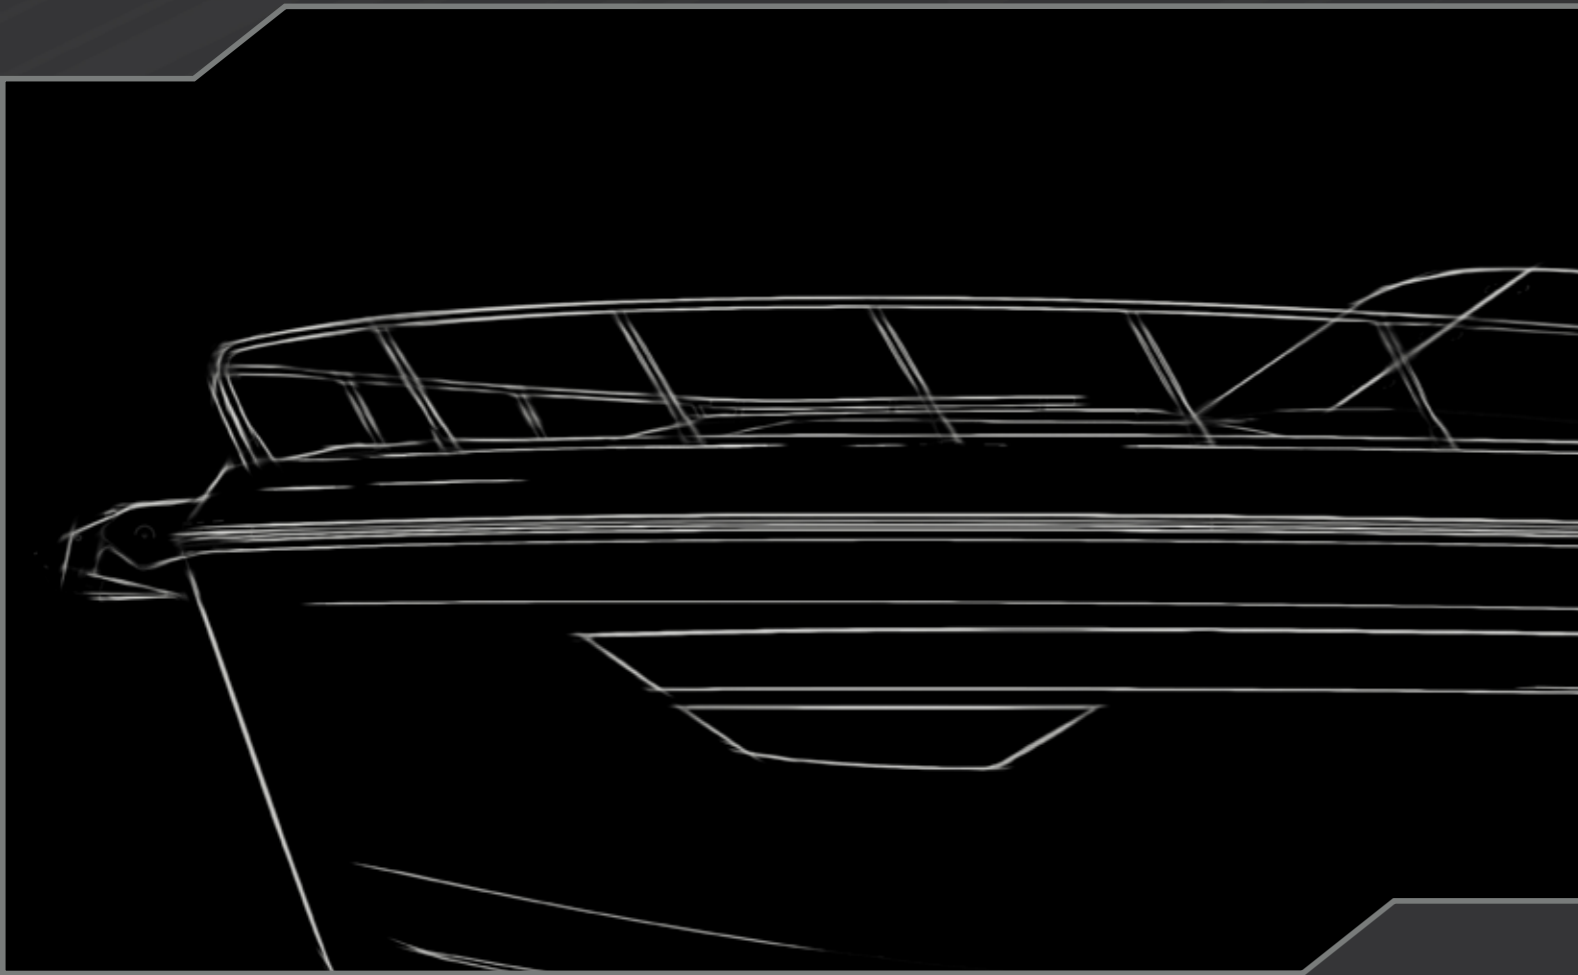

ORYX 379

A combination of striking style and superior technology, the new Oryx 379 is the perfect sport cruiser both for first time boat owners and experienced alike. Her windows are seamlessly streamlined along the sides for balance and symmetry.

Her windshield is a curved glass angled precisely to deflect wind and direct airflow above the cockpit and passenger's head, ensuring comfort at high speed. The clever use of space onboard provides unobstructed movement both for the captain and passengers.

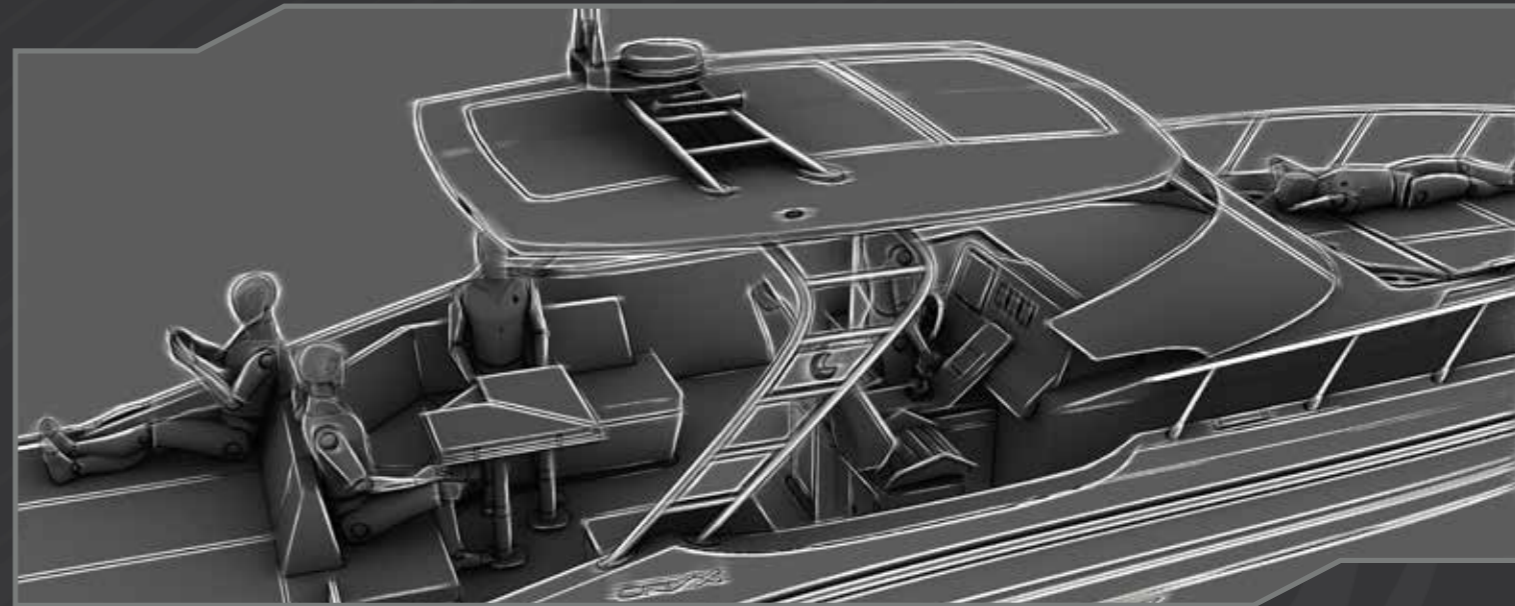

With the launch of the new 379 sport cruiser, it's a complete revolution from what we've always done at Gulf Craft. Today, we take the next step in creating the new DNA of the brand.

An Oryx for the next generation.

Featuring a distinctive near plumb bow design, Oryx 379 provides a smoother ride and more interior cabin space. With innovative research, this masterpiece combines power and performance with exceptional styling to match.

The new Oryx ensures maximum space utilization both in exterior and interior layout of the boat. Rigid and robust, these elegant creations are built for luxury and comfort with an eye for detail dedication to excellent craftsmanship.

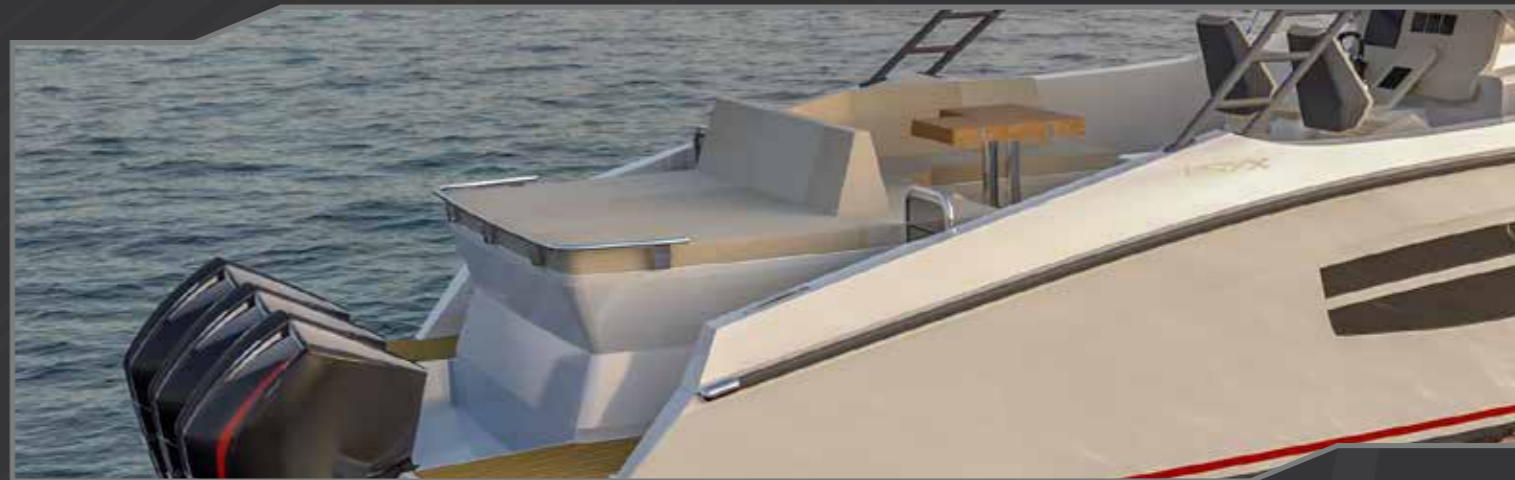

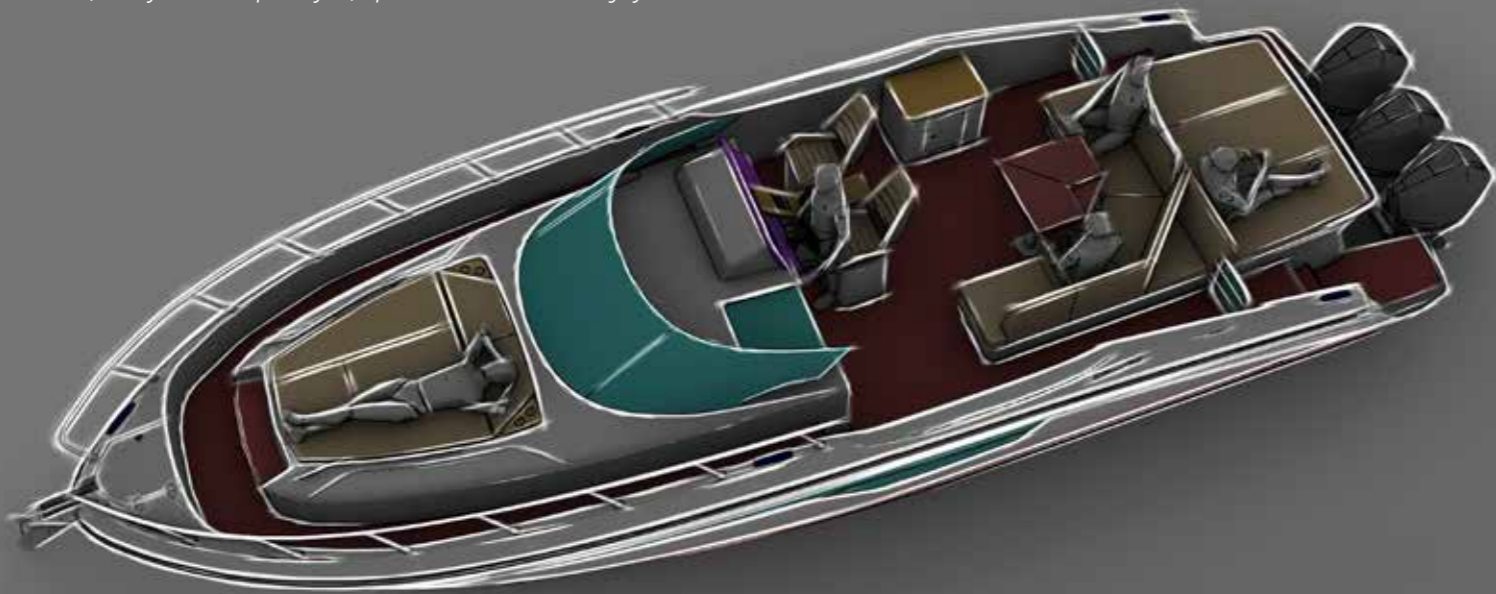

Sycamore Interior Finish

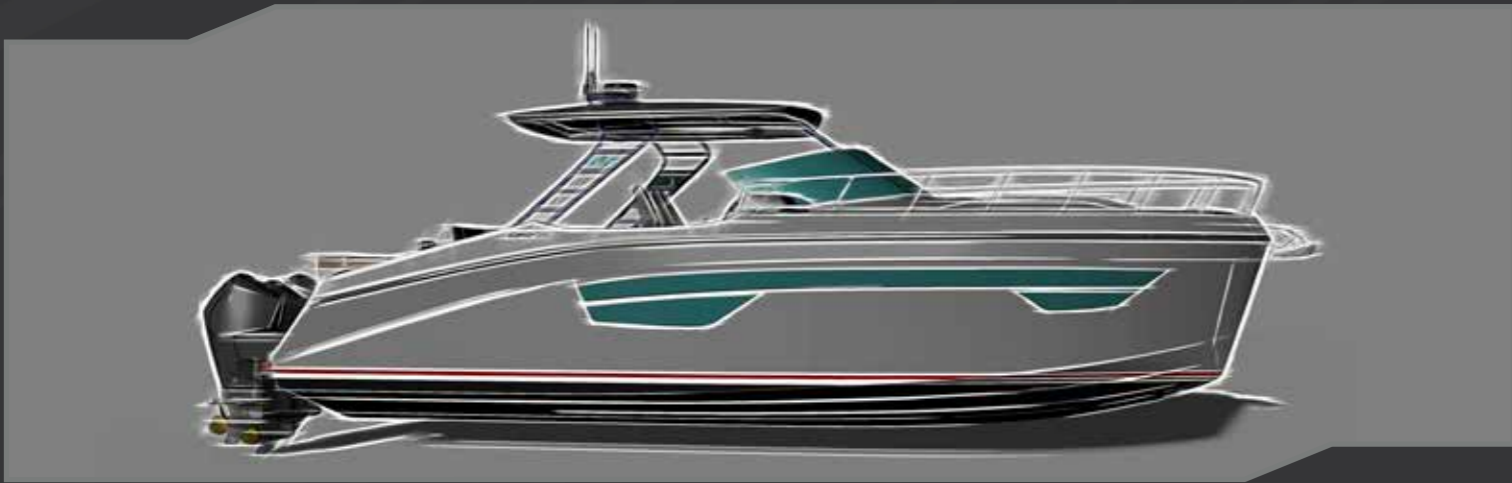

Walnut Interior Finish

Featuring a comfortable sunbed and aft seating for the whole family, there's plenty of space to relax and enjoy.

Sycamore Interior Finish

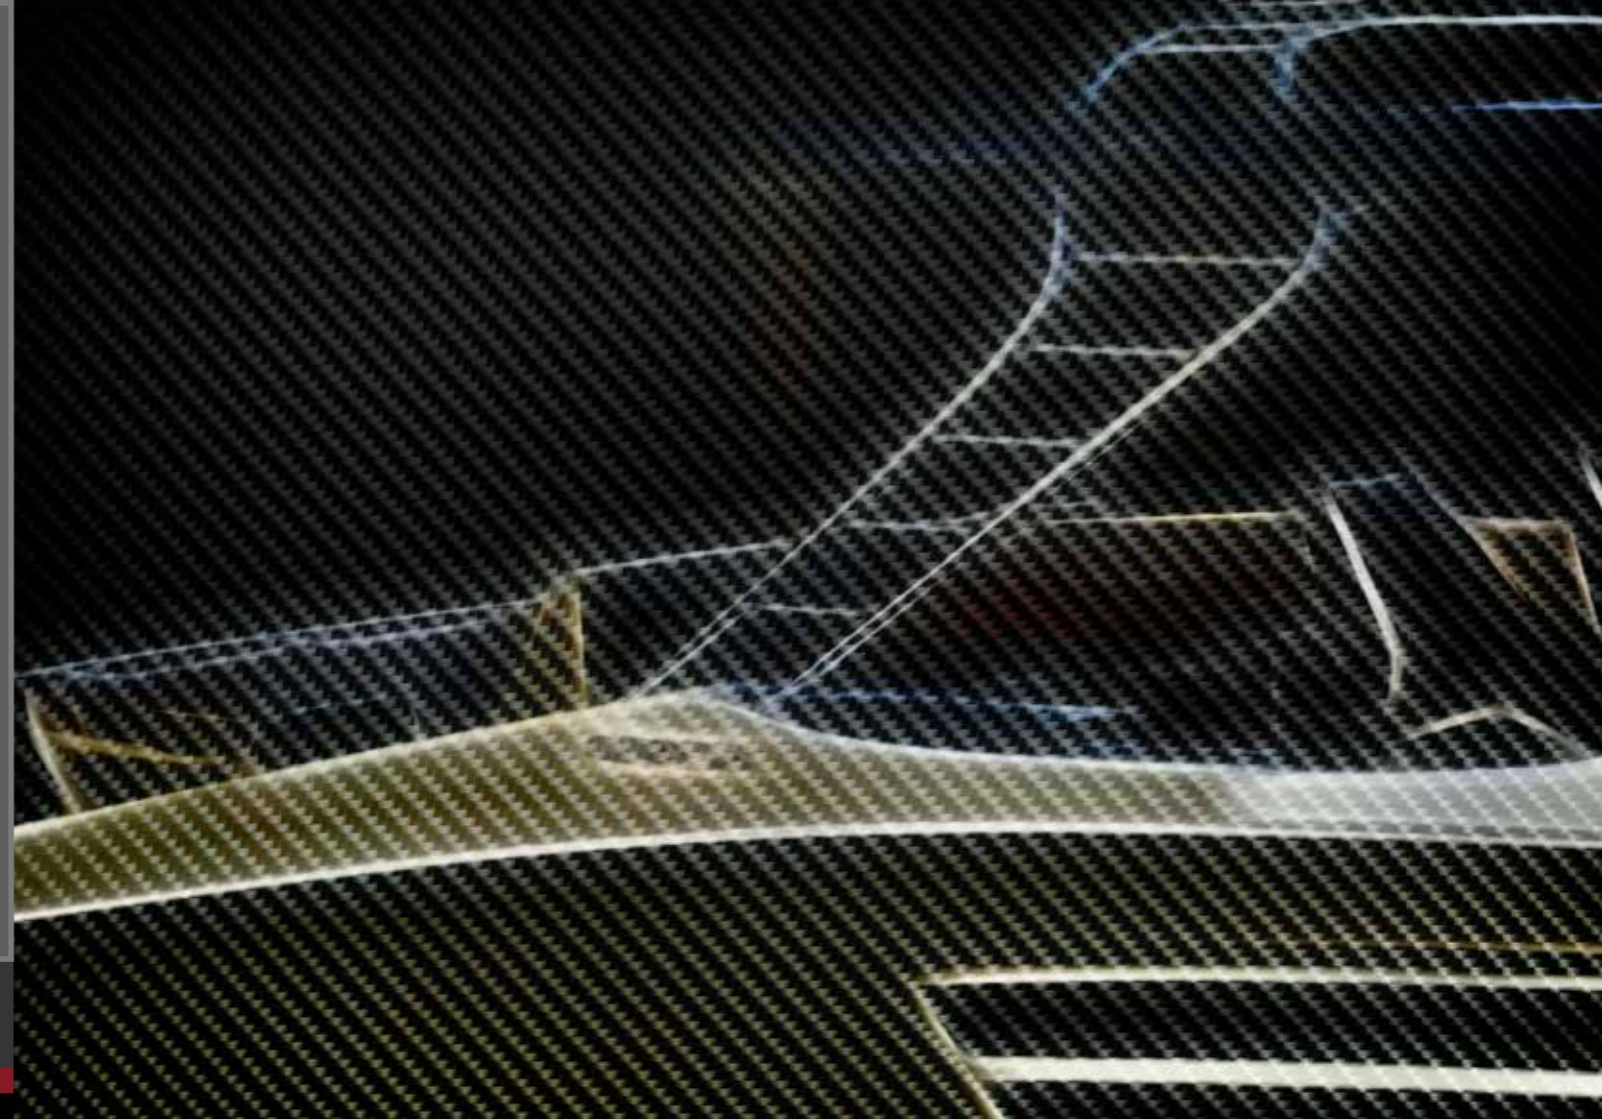

Walnut Interior Finish

The once endangered Oryx is known for its long straight horns and distinctive patterns. You can find many design elements informed by this sleek and graceful animal, from the side glass inspired by its impressive leap or the hard top, reminiscent of the aggressive ridges of its horns.

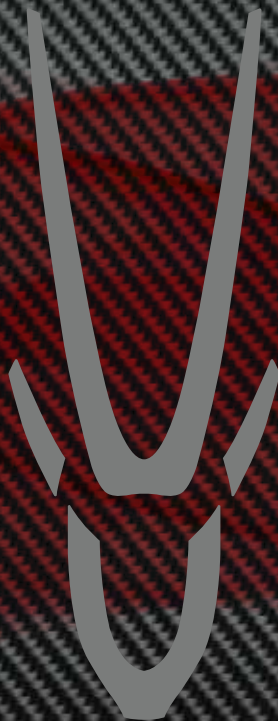

Inspired by nature, giving art, elegance and form.
